International Symposium on Pufferfish
13-14 October 2017, Bodrum, Turkey

Dear Colleagues,

It is a great honor and pleasure host all you in the International Symposium on Pufferfish from 13 to 14 October 2017 in Bodrum, Turkey.

Pufferfishes are represented with 11 species (*Ephippion guttiferum*, *Lagocephalus lagocephalus*, *L. sceleratus*, *L. spadiceus*, *L. suezensis*, *L. guentheri*, *Sphoeroides marmoratus*, *S. pachygaster*, *S. spengleri*, *Torquigener flavimaculosus*, *Tylerius spinosissimus*) belonging to Tetraodontidae family in the Mediterranean. Especially, *L. sceleratus* is one of the most damaging, aggressive predatory invasive species, economically and ecologically. It was first recorded in Gokova Bay in Turkey in 2003 and started to create problems after few years. There have been major complaints about the damage of this species given to the fishers through the fishing gears and catch entangled to fishing gears since 2006. On the other hand, it has not exactly known how this species effect to ecosystem in Mediterranean marine waters. From the socio-economic point of view there are only two studies indicating numerical results, economic loss caused by this species.

The symposium focus on the themes belonging to the Tetraodontidae species and include invited talks, oral and poster presentations. Moreover, the sessions will also concentrate upon the most recent scientific findings about Tetraodontidae species and regarding topics.

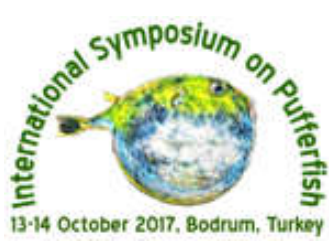

The symposium will bring together leading scientists in the domain of interest from around the world. Around hundred participants from 15 different countries presented oral and poster presentations. It will be a great honor for us to host you in Bodrum, Turkey. The accepted abstracts presented in the International Symposium on Pufferfish will be published as a Supplement in the Natural and Engineering Sciences (NESciences). If required full text of the presentation can be published in the Natural and Engineering Sciences after reviewing process. We would like to thank all participants for their attendance to the symposium program and for their contributions, cooperation. This abstract book, which has unique source for the researchers, administrative, NGOs, fishers whoever interested in pufferfish, contains the written versions of the presentations (both oral and poster) delivered during the symposium.

We express our kind thanks to the Iskenderun Technical University, Ege University, UNESCO, Bodrum Municipality, Turkish Underwater Sports Federation, Natural and Engineering Sciences, Nature and Science Society, TUDAV and Mediterranean Conservation Society for their kind support. Many thanks as well to the scientific and organizing committee and students-team worked voluntarily.

Yours sincerely,

Cemal Turan and Vahdet Ünal
